STATISTICAL REVIEW OF SUBVERSIVE ACTIVITIES in the ARGENTINE REPUBLIC,
SEPTEMBER 1st, 1976 to SEPTEMBER 1st, 1977.

The data used to compile this statistical review was obtained from official Argentine Government sources. However, the information is not complete because there is no absolute centralization of terrorist reports and many times information about these activities is concealed from other elements of the security forces. Additionally, some terrorist attacks are never reported to the authorities. This is particularly true in the case of kidnapping. Also, occasionally labor violence manifests itself as terrorist violence in official reports. However, in spite of these caveats the information is accurate in portraying a major reduction in almost all areas of terrorist activities from September 1, 1976 to September 1, 1977.

Chart No.

STATISTICAL REVIEW OF SUBVERSIVE ACTION - September 1, 1976 - September 1, 1977

Kidnappings: This is the crime most difficult to obtain authentic figures on because many of those affected come to an agreement with the terrorists on their own, without reporting it to the authorities.

Attempts on Persons: Refers to the number of attempts on the lives of civilians, military men and policemen, regardless of the results achieved. Failed attempts have been included.

Attacks on Units and Patrols: Refers to attacks organized by terrorist forces against police stations, posts, guard posts and police patrols. Combats as a result of casual confrontations with the terrorists are not included.

Robbery of Weapons: Most of them from police personnel that were killed or wounded, in order to obtain their weapons.

Bombs: Statistics for bombs are the least centralized of crimes. Those that have been detonated are included here, but not those which were deactivated.
